

PROBLEMS OF ROMANIAN ECONOMY SUSTAINABILITY UNDER THE CIRCUMSTANCES OF EU INTEGRATION AND GLOBALIZATION PROCESSES

PhD.Professor GHEORGHE ZAMAN¹

Abstract

The paper is dealing with the evaluation of economic and financial external disequilibria of Romanian economy, foreign direct investment impact and crediting system in Romania with lei and euro denomination. The analysis refers to pre and post-accession periods of macroeconomic relevant indicators. The main conclusions and recommendations are focusing on ways and tools for increasing economic efficiency of foreign trade via improvement of relationship between reinvested and repatriated profits of firms with foreign direct investment, and of increasing the share of high tech activities in manufacturing, industries, reducing interest rates of loans on short, medium and long terms, promoting credits for nonfinancial entities in order to boost the investment as an important factor of the exit from of crisis and sustainable relaunch of economic growth.
