

CONTEMPORARY TRENDS OF EVOLUTION OF ROMANIAN'S ACCOUNTING MISSION FROM THE PERSPECTIVE OF SUSTAINABLE DEVELOPMENT

Lecturer PhD. Student VASILE FUMEA¹, Lecturer PhD. DANIELA RODICA IOV²

Abstract

In this era, in which corporate social responsibility (CSR) is becoming more and more provinces, in discussion of the agendas for board meetings, organizations, and companies need to find ways as better and more practical to meet the concerns and needs of the communities with regard to the environmental and social impacts that business activities you may have. Sustainable accounting helps identify opportunities to leverage the company's sustainability and to minimise the risk of adverse effects on people and the natural environment in which they live. Identification of these opportunities will be critical challenges increasingly higher for professional accountants, financiers and economists of the future.
