*Ec. SORANA VAIDĂHĂZAN<sup>1</sup>*

**Abstract**

*Sustainability is guaranteed by the possibility of continuing the project and its positive effects after removing funding for the Sectoral Operational Programme Human Resources Development. The purpose of the project is supported by arguments that include proposed measures to be applied both in the project and after its implementation, firmly ensuring that development or benefits achieved for the chosen target group are guaranteed in the future. Sustainability of the project is that will decrease the number of people with physical disabilities, who haven't a job, training other people, with or without disabilities, and achieve project implementation in other target groups, both regionally and nationally.*
