

**WATER PROTECTION THROUGH INSTITUTIONAL INVOLVEMENT AND
PUBLIC PARTICIPATION. STUDY CASE ON TARNIȚA-GILĂU CATCHMENT
AREA (NW ROMANIA)**

Associate Professor PhD. DACINIA CRINA PETRESCU¹

Abstract

Tarnița-Gilău Pollution Prevention Plan (T-G PPP) is an action plan created with the main goal to achieve and sustain a good quality of all waters in Tarnița-Gilău catchment area (NW of Romania). The paper presents its principles, objectives and actions and the way they are combined to obtain the best results from sustainable development perspective. The role of public participation, of education and information actions is highlighted to show how they enhance the functions of construction works for environment protection.
